## Target Details

Amino Enhancer of Split, Amino terminal enhancer of split, Amino-terminal enhancer of split, Esp 1, Esp1, Gp130 associated protein GAM, Gp130-associated protein GAM, GRG 5, GRG, GRG protein, GRG5, Protein ESP 1, Protein ESP1, Protein GRG, TLE 5, TLE5.

Background: TLE5 is a 197 amino acid nuclear protein that belongs to the TLE family.

Expressed predominately in fetal brain, liver, lung, heart and kidney and in adult muscle, TLE5 functions as either a homooligomer or a heterooligomer with other TLE family members and, through this association, dominantly represses the expression of TLE genes. In addition, TLE5 can repress NFkB-regulated gene expression and is thought to play an important role in initiating and maintaining cell differentiation events. Two isoforms of TLE5 exist due to alternative splicing events.
