| Quantity:            | 100 μL   |  |
|----------------------|--|--|
| Target:              | Golgin A3 (GOLGA3)   |  |
| Binding Specificity: | AA 951-1050  |  |
| Reactivity:          | Human  |  |
| Host:                | Rabbit   |  |
| Clonality:           | Polyclonal   |  |
| Conjugate:           | This Golgin A3 antibody is conjugated to Alexa Fluor 555   |  |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |  |

## **Product Details**

| Immunogen:            | KLH conjugated synthetic peptide derived from human Golgin 160 |
|-----------------------|--|
| Isotype:              | IgG  |
| Predicted Reactivity: | Human,Mouse,Rat,Cow,Sheep,Rabbit                               |
| Purification:         | Purified by Protein A.   |

# **Target Details**

| Target:           | Golgin A3 (GOLGA3)  |
|-------------------|---|
| Alternative Name: | Golgin 160 (GOLGA3 Products)  |
| Background:       | Synonyms: GCP170, GOLGA 3, GOLGA3, Golgi autoantigen, Golgi complex associated protein of |

170 kDa, Golgi complex-associated protein of 170 kD, Golgi membrane associated protein, Golgi peripheral membrane protein, Golgin 160, Golgin subfamily a 3, HGNC:4426, Male enhanced antigen 2, MEA2, SY2/SY10 protein, GOGA3\_HUMAN.

Background: The Golgi apparatus consists of a series of stacked, flattened membrane stacks called cisternae that are involved in the transport of lipids and proteins in the secretory pathway and are important for Golgi-microtubule interaction. Golgin 160 is a 1,498 amino acid protein that localizes to both the cytoplasm and to the Golgi apparatus and contains a series of coiled-coil domains. Expressed in a variety of tissues, including heart, liver, testis, kidney, lung and salivary gland, golgin 160 functions as a homodimer that interacts with GOLGA7 and is thought to be involved in maintaining Golgi structure and may play a role in nuclear transport and Golgi apparatus localization. Multiple isoforms of golgin 160 exist due to alternative splicing events.

Gene ID:

2802

Pathways:

SARS-CoV-2 Protein Interactome

## **Application Details**

Application Notes:

IF(IHC-P) 1:50-200

IF(IHC-F) 1:50-200

IF(ICC) 1:50-200

Restrictions:

For Research Use only

## Handling

| Format:            | Liquid   |
|--------------------|--|
| Concentration:     | 1 μg/μL  |
| Buffer:            | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.         |
| Preservative:      | ProClin  |
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |
| Storage:           | -20 °C   |
| Storage Comment:   | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                                  |
| Expiry Date:       | 12 months  |
