Target Details

Target:	LSMEM1 (C7ORF53)
Alternative Name:	C7orf53 (C7ORF53 Products)
Background:	Synonyms: C7orf53, CG053_HUMAN, Chromosome 7 open reading frame 53, Coiled-coil

Target Details

domain-containing transmembrane protein C7orf53.

Background: Chromosome 7 has been linked to Osteogenesis imperfecta, Pendred syndrome, Lissencephaly, Citrullinemia and Shwachman-Diamond syndrome. The deletion of a portion of the q arm of chromosome 7 is associated with Williams-Beuren syndrome, a condition characterized by mild mental retardation, an unusual comfort and friendliness with strangers and an elfin appearance. Deletions of portions of the q arm of chromosome 7 are also seen in a number of myeloid disorders including cases of acute myelogenous leukemia and myelodysplasia. The C7orf53 gene product has been provisionally designated C7orf53 pending further characterization.
