	synthase mitochondrial, FPGS, mitochondrial, OTTHUMP00000022201,
	OTTHUMP00000022202, Tetrahydrofolate synthase, Tetrahydrofolylpolyglutamate synthase.
	Background: This gene encodes the folylpolyglutamate synthetase enzyme. This enzyme has a
	central role in establishing and maintaining both cytosolic and mitochondrial folylpolyglutamate
	concentrations and, therefore, is essential for folate homeostasis and the survival of
	proliferating cells. This enzyme catalyzes the ATP-dependent addition of glutamate moieties to
	folate and folate derivatives. While several transcript variants may exist for this gene, the full-
	length natures of only two have been biologically validated to date. These two variants encode
	distinct isoforms. [provided by RefSeq, Jul 2008].
