## **Target Details**

Background:	Synonyms: Brain specic homeobox, Brain specic homeobox protein homolog, BSH, BSX1,
	BSH_HUMAN.
	Background: BSX(Brain-specific homeobox protein homolog) may play a role in the
	determination and function of cell types in the brain. In brain, it is restricted to a few specific
	developing brain structures such as pineal gland, telencephalic septum, hypothalamic pre-
	mammillary body and arcuate nucleus. Bsx might be considered an important molecular
	marker for early embryonic stages of epiphysis development. It belongs to the distal-less
	homeobox family and contains 1 homeobox DNA-binding domain.
