Datasheet for ABIN1701804 anti-FANCM antibody (AA 831-930) (Cy3)

antibodies .-online.com

Overview

Quantity:	100 μL	
Target:	FANCM	
Binding Specificity:	AA 831-930	
Reactivity:	Human	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This FANCM antibody is conjugated to Cy3	
Application:	Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))	

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human FANCM	
Isotype:	IgG	
Predicted Reactivity:	Human	
Purification:	Purified by Protein A.	

Target Details

Target:	FANCM
Alternative Name:	FANCM (FANCM Products)
Background:	Synonyms: FAAP250, Fanconi anemia group M protein, Protein Hef ortholog,

	Background: Fanconi anemia (FA) is an autosomal recessive disorder characterized by bone	
	marrow failure, birth defects and chromosomal instability. At the cellular level, FA is	
	characterized by spontaneous chromosomal breakage and a unique hypersensitivity to DNA	
	cross-linking agents. The thirteen FA proteins that have been characterized are important for	
	regulating chromosomal stability and genome surveillance. Eight of these proteins, namely	
	FANCA, FANCB, FANCC, FANCE, FANCF, FANCG, FANCL and FANCM, comprise the FA core	
	complex, which catalyzes a key reaction in DNA repair: the monoubiquitination of FANCD2.	
	FANCM (Fanconi anemia, complementation group M) is a member of the DEAD-box helicase	
	family of proteins and contains a DEAH helicase domain and a nuclease domain. Localizing to	
	chromatin fractions, FANCM is phosphorylated in a cell cycle-dependent manner and is	
	believed to function as an anchor, recruiting the FA core complex to chromatin. Mutations in	
	the gene encoding FANCM can lead to Fanconi anemia.	
Gene ID:	57697	
Pathways:	DNA Damage Repair	
Application Details		
Application Details		
Application Notes:	IF(IHC-P) 1:50-200	
	IF(IHC-F) 1:50-200	
	IF(ICC) 1:50-200	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Concentration:	1 μg/μL	
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and	
	50 % Glycerol.	
Preservative:	ProClin	
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be	
	handled by trained staff only.	
Storage:	-20 °C	
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
