Alternative Name:	Heparanase 2 (HPSE2 Products)
Background:	Synonyms: heparanase 2, heparanase 3, Heparanase-2, Heparanase 2, heparanase-like protein,

Target Details

Hpa2, HPR2, HPSE2, HPSE2_HUMAN, UFS, Inactive heparanase-2.

Background: This gene encodes a heparanase enzyme. The encoded protein is a endoglycosidase that degrades heparin sulfate proteoglycans located on the extracellular matrix and cell surface. This protein may be involved in biological processes involving remodeling of the extracellular matrix including angiogenesis and tumor progression. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Oct 2009].
