|--------|--------------|-------|
| ( )\)  | $\alpha r v$ | iew   |
| Οv     |              | 10,00 |

| Quantity:            | 100 µL  |
|----------------------|---|
| Target:              | DOCK4   |
| Binding Specificity: | AA 1001-1100  |
| Reactivity:          | Human   |
| Host:                | Rabbit  |
| Clonality:           | Polyclonal  |
| Conjugate:           | This DOCK4 antibody is conjugated to Cy7  |
| Application:         | Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Immunofluorescence (Cultured Cells) (IF (cc)) |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human DOCK4 |
|-----------------------|---|
| Isotype:              | lgG   |
| Predicted Reactivity: | Human,Mouse,Rat,Dog,Cow,Sheep,Pig,Horse,Chicken,Rabbit    |
| Purification:         | Purified by Protein A.                                    |

## Target Details

| Target:           | DOCK4   |
|-------------------|---|
| Alternative Name: | DOCK4 (DOCK4 Products)  |
| Background:       | Synonyms: Dedicator of cytokinesis protein 4, Dock4, DOCK4_HUMAN, KIAA0716. |

|                     | Background: DOCK 4 is a cytoplasmic peripheral membrane protein that belongs to the DOCK        |  |
|---------------------|---|--|
|                     | family of cytokinesis-regulating proteins. Expressed ubiquitously with highest expression in    |  |
|                     | prostate, ovary and skeletal muscle, DOCK 4 functions as a guanine nucleotide exchange factor   |  |
|                     | (GEF) that activates the small GTPase Rap 1 and, via this activation, plays a role in the       |  |
|                     | regulation of adherens junctions between cells. Similar to other DOCK family members, DOCK 4    |  |
|                     | contains an N-terminal SH3 domain, a C-terminal proline-rich region and two internal DOCK       |  |
|                     | homology regions designated DHR1 and DHR2. Defects in the gene encoding DOCK 4 result in        |  |
|                     | the inactivation of Rap 1 and are, thus, implicated in the pathogenesis of various cancers such |  |
|                     | as ovarian, prostate, glioma and colorectal carcinomas. Four isoforms of DOCK 4 are             |  |
|                     | expressed due to alternative splicing events.   |  |
| Gene ID:            | 9732  |  |
| Application Details |   |  |
| Application Notes:  | IF(IHC-P) 1:50-200  |  |
|                     | IF(IHC-F) 1:50-200  |  |
|                     | IF(ICC) 1:50-200  |  |
| Restrictions:       | For Research Use only   |  |
| Handling            |   |  |
| Format:             | Liquid  |  |
| Concentration:      | 1 µg/µL   |  |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and    |  |
|                     | 50 % Glycerol.  |  |
| Preservative:       | ProClin   |  |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be             |  |
|                     | handled by trained staff only.  |  |
| Storage:            | -20 °C  |  |
| Storage Comment:    | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.               |  |
| Expiry Date:        | 12 months   |  |
|                     |   |  |
