antibodies

Datasheet for ABIN1711078 anti-ODF2 antibody (AA 1-100) (HRP)

\sim				
()	ve	r\/I	D)	٨I
\circ	V C			v v

Quantity:	100 μL	
Target:	ODF2	
Binding Specificity:	AA 1-100	
Reactivity:	Rat	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This ODF2 antibody is conjugated to HRP	
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunohistochemistry (Frozen Sections) (IHC (fro))	

Product Details

Alternative Name:

Immunogen:	KLH conjugated synthetic peptide derived from human ODF2/Cenexin1	
Isotype:	lgG	
Cross-Reactivity:	Rat	
Predicted Reactivity:	Human	
Purification:	Purified by Protein A.	
Target Details		
Target:	ODF2

ODF2/Cenexin1 (ODF2 Products)

Target Details	
Background:	Synonyms: sperm tail structural protein, 84 kDa outer dense fiber protein, Cenexin 1, Cenexin1
	variant 1, KKT 4, KKT4, ODF 2, ODF 84, ODF2, ODF2/1, ODF2/2, ODF84, Outer dense fiber of
	sperm tail 2, Outer dense fiber of sperm tails 2, outer dense fiber of sperm tails, Outer dense
	fiber of sperm tails protein 2, Outer dense fiber of sperm tails, 84 kD, Outer dense fiber protein 2,
	Sperm outer dense fiber major protein 2, Testis specic autoantigen, ODFP2_HUMAN.
	Background: Cenexin1 is an isoform of ODF2, that unlike ODF2 is present in several somatic cell
	types. Cenexin1 acts as a general scaffold protein that is specifically localised to the
	distal/subdistal appendages of mother centrioles. Cenexin1 is required for proper localization
	of Plk1 to the centrosomes. This centrosomal localization of Plk1 is required for proper
	microtubule function. Cenexin1 recruits Plk1 via a C-terminal extension of cenexin1 that is not
	present in ODF2. Cenexin1 is required for proper mitotic progression, depletion of
	Cenexin1 μ Ltimately leads to chromosome missegregation and apoptosis. The ODF2 (outer
	dense fiber 2) gene encodes both ODF2 and Cenexin1, which have very different functions.
	ODF2 is a major component of sperm tail outer dense fibers (ODFs). ODFs are filamentous
	structures located on the outside of the axoneme in the midpiece and principal piece of the
	mammalian sperm tail. They may help to maintain the passive elastic structures and elastic
	recoil of the sperm tail, and may also modulate sperm motility.
Gene ID:	4957

Gene ID:	4957
Pathways:	M Phase

Application Details

Application Notes:	WB 1:300-5000
	IHC-P 1:200-400
	IHC-F 1:100-500
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin

Handling

Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Handling Advice:	Do NOT add Sodium Azide! Use of Sodium Azide will inhibit enzyme activity of horseradish peroxidase.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
