| Quantity:            | 100 μL                                                                                                                 |
|----------------------|------------------------------------------------------------------------------------------------------------------------|
| Target:              | DOCK4                                                                                                                  |
| Binding Specificity: | AA 1001-1100                                                                                                           |
| Reactivity:          | Human                                                                                                                  |
| Host:                | Rabbit                                                                                                                 |
| Clonality:           | Polyclonal                                                                                                             |
| Conjugate:           | This DOCK4 antibody is conjugated to HRP                                                                               |
| Application:         | ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunohistochemistry (Frozen Sections) (IHC (fro)) |

#### **Product Details**

| Immunogen:            | KLH conjugated synthetic peptide derived from human DOCK4       |
|-----------------------|-----------------------------------------------------------------|
| Isotype:              | IgG                                                             |
| Predicted Reactivity: | Human, Mouse, Rat, Dog, Cow, Sheep, Pig, Horse, Chicken, Rabbit |
| Purification:         | Purified by Protein A.                                          |

## **Target Details**

| Target:                                                                                 | DOCK4                  |
|-----------------------------------------------------------------------------------------|------------------------|
| Alternative Name:                                                                       | DOCK4 (DOCK4 Products) |
| Background: Synonyms: Dedicator of cytokinesis protein 4, Dock4, DOCK4_HUMAN, KIAA0716. |                        |

Background: DOCK 4 is a cytoplasmic peripheral membrane protein that belongs to the DOCK family of cytokinesis-regulating proteins. Expressed ubiquitously with highest expression in prostate, ovary and skeletal muscle, DOCK 4 functions as a guanine nucleotide exchange factor (GEF) that activates the small GTPase Rap 1 and, via this activation, plays a role in the regulation of adherens junctions between cells. Similar to other DOCK family members, DOCK 4 contains an N-terminal SH3 domain, a C-terminal proline-rich region and two internal DOCK homology regions designated DHR1 and DHR2. Defects in the gene encoding DOCK 4 result in the inactivation of Rap 1 and are, thus, implicated in the pathogenesis of various cancers such as ovarian, prostate, glioma and colorectal carcinomas. Four isoforms of DOCK 4 are expressed due to alternative splicing events.

Gene ID:

9732

### **Application Details**

Application Notes: IHC-P 1:200-400

IHC-F 1:100-500

Restrictions: For Research Use only

#### Handling

| Format:            | Liquid                                                                                                             |
|--------------------|--------------------------------------------------------------------------------------------------------------------|
| Concentration:     | 1 μg/μL                                                                                                            |
| Buffer:            | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.         |
| Preservative:      | ProClin                                                                                                            |
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |
| Handling Advice:   | Do NOT add Sodium Azide! Use of Sodium Azide will inhibit enzyme activity of horseradish peroxidase.               |
| Storage:           | -20 °C                                                                                                             |
| Storage Comment:   | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                                  |
| Expiry Date:       | 12 months                                                                                                          |
