Background: Synonyms: CAPG, CHCG, Chromosome associated protein G, Chromosome condensation protein G, Condensin complex subunit 3, Condensin subunit CAP G, HCAP G, Melanoma antigen NY MEL 3, NCAPG, Non SMC condensin I complex, subunit G, NY MEL 3, XCAP G homolog, CND3_HUMAN.

Background: HCAP G is a subunit of the condensin complex, which is responsible for the condensation and stabilization of chromosomes during mitosis and meiosis. Phosphorylation of the encoded protein activates the condensin complex. There are pseudogenes for this gene on chromosomes 8 and 15. Alternative splicing results in multiple transcript variants.
