| Quantity:            | 100 μL  |
|----------------------|---|
| Target:              | FAM65B  |
| Binding Specificity: | AA 201-300  |
| Reactivity:          | Mouse   |
| Host:                | Rabbit  |
| Clonality:           | Polyclonal  |
| Conjugate:           | This FAM65B antibody is un-conjugated   |
| Application:         | Western Blotting (WB), ELISA, Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Immunohistochemistry (Frozen Sections) (IHC (fro)), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunocytochemistry (ICC) |

#### **Product Details**

| Immunogen:            | KLH conjugated synthetic peptide derived from human FAM65B |
|-----------------------|--|
| Isotype:              | IgG  |
| Cross-Reactivity:     | Mouse  |
| Predicted Reactivity: | Human,Rat,Dog,Cow,Sheep,Pig,Horse,Rabbit                   |
| Purification:         | Purified by Protein A.                                     |

## **Target Details**

Target: FAM65B

## **Target Details**

| Alternative Name:      | FAM65B (FAM65B Products)  |
|------------------------|---|
| Background:            | Synonyms: Ab2 162, C6orf32, DF48, FA65B_HUMAN, Fam65b, KIAA0386, PL48, Protein  |
|                        | FAM65B.  Packground: Making up packy 6 % of the human gapame observaceme 6 centains around  |
|                        | Background: Making up nearly 6 % of the human genome, chromosome 6 contains around 1,200 genes within 170 million base pairs of sequence. Deletion of a portion of the q arm of |
|                        | chromosome 6 is associated with early onset intestinal cancer suggesting the presence of a  |
|                        | cancer susceptibility locus. Porphyria cutanea tarda is associated with chromosome 6 through  |
|                        | the HFE gene which, when mutated, predisposes an individual to developing this porphyria.   |
|                        | Notably, the PARK2 gene, which is associated with Parkinson's disease, and the genes  |
|                        | encoding the major histocompatiblity complex proteins, which are key molecular components   |
|                        | of the immune system and determine predisposition to rheumatic diseases, are also located or  |
|                        | chromosome 6. Stickler syndrome, 21-hydroxylase deficiency and maple syrup urine disease  |
|                        | are also associated with genes on chromosome 6. A bipolar disorder susceptibility locus has   |
|                        | been identified on the q arm of chromosome 6. The C6orf32 gene product has been   |
|                        | provisionally designated C6orf32 pending further characterization.  |
| Gene ID:               | 9750  |
| Pathways:              | Transition Metal Ion Homeostasis  |
| Application Details    |   |
| Application Notes:     | WB 1:300-5000   |
| Application Notes.     | ELISA 1:500-1000  |
|                        | IHC-P 1:200-400   |
|                        | IHC-F 1:100-500   |
|                        | IF(IHC-P) 1:50-200  |
|                        | IF(IHC-F) 1:50-200  |
|                        | IF(ICC) 1:50-200  |
|                        | ICC 1:100-500   |
| Restrictions:          | For Research Use only   |
| Handling               |   |
|                        |   |
| Format:                | Liquid  |
| Format: Concentration: | Liquid 1 μg/μL  |

# Handling

| Preservative:      | ProClin  |
|--------------------|--|
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |
| Storage:           | 4 °C,-20 °C  |
| Storage Comment:   | Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.                                    |
| Expiry Date:       | 12 months  |
