## Overview

|                      |                                        |
|----------------------|----------------------------------------|
| Quantity:            | 100 µL                                 |
| Target:              | LPO                                    |
| Binding Specificity: | AA 650-712, C-Term                     |
| Reactivity:          | Cow, Human, Mouse, Goat, Sheep         |
| Host:                | Rabbit                                 |
| Clonality:           | Polyclonal                             |
| Conjugate:           | This LPO antibody is conjugated to HRP |
| Application:         | Western Blotting (WB)                  |

## Product Details

|               |                                                                                                |
|---------------|------------------------------------------------------------------------------------------------|
| Immunogen:    | Synthetic peptide made to a C-terminal portion of the human protein (within residues 650-712). |
| Isotype:      | IgG                                                                                            |
| Specificity:  | Reacts with Lactoperoxidase from human, mouse, sheep, bovine and goat                          |
| Purification: | Antigen affinity purified                                                                      |

## Target Details

|                   |                                                  |
|-------------------|--------------------------------------------------|
| Target:           | LPO                                              |
| Alternative Name: | Lactoperoxidase ( <a href="#">LPO Products</a> ) |
| UniProt:          | <a href="#">P22079</a>                           |

Application Details

|                    |                                                                                                                                           |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Application Notes: | Working dilution: Optimal dilution should be determined by the end user.<br>The following are guidelines only:<br>- WB : 0.5 to 2.0 µg/mL |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------|

|               |                       |
|---------------|-----------------------|
| Restrictions: | For Research Use only |
|---------------|-----------------------|

Handling

|                  |                              |
|------------------|------------------------------|
| Format:          | Liquid                       |
| Buffer:          | PBS                          |
| Storage:         | 4 °C                         |
| Storage Comment: | Store at 4°C. Do not freeze. |
