# anti-BET1L antibody (AA 3-86)

**Images** 

Publication

-						
O	V	e	rv	1	е	W

Quantity:	50 μg
Target:	BET1L
Binding Specificity:	AA 3-86
Reactivity:	Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Application:	Western Blotting (WB), Immunocytochemistry (ICC)

#### **Product Details**

Immunogen:	Purified recombinant mouse GS 15 (aa 3-86).
Specificity:	Specific for GS 15.
Purification:	Affinity purified with the immunogen. Rabbit serum albumin was added for stabilization.

# **Target Details**

Target:	BET1L
Alternative Name:	GS 15 (BET1L Products)
Background:	Synonyms: GOS 15, Bet 1L

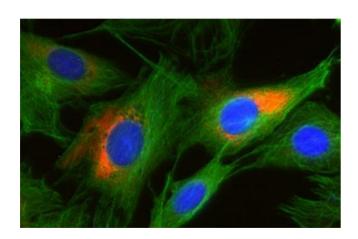

# **Application Details**

Application Notes: WB: 1:1000 (AP staining)

### **Application Details**

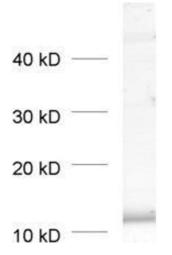

Buffer:  PBS  Handling Advice:  Affinity purified antibodies are less robust than antisera, since protease inhibitors are also removed during purification. Hence, storage at 4 °C for prolonged periods (i.e. several wee not recommended.  Storage:  -20 °C  Storage Comment:  Unlabeled lyophilized antibodies are stable in this form without loss of quality at ambient temperatures for several weeks or even months. They can be stored at 4°C for several year Lyophilized antibodies must not be stored in the freezer, they may be destroyed!  Publications  Product cited in:  Schildknecht, Karreman, Pöltl, Efrémova, Kullmann, Gutbier, Krug, Scholz, Gerding, Leist: "Generation of genetically-modified human differentiated cells for toxicological tests and the study of neurodegenerative diseases." in: ALTEX, Vol. 30, Issue 4, pp. 427-44, (2013) (Publications)  Tong, Wong, Guttman, Ang, Forno, Shimadzu, Rajput, Muenter, Kish, Hornykiewicz, Furuka Brain alpha-synuclein accumulation in multiple system atrophy, Parkinson's disease and	Application Details	
Restrictions:  For Research Use only  Handling  Format:  Lyophilized  Reconstitution:  For reconstitution add 50 µL H2O to get a 1mg/ml solution of antibody in PBS. Then alique store at -20 °C until use.  Buffer:  PBS  Handling Advice:  Affinity purified antibodies are less robust than antisera, since protease inhibitors are also removed during purification. Hence, storage at 4 °C for prolonged periods (i.e. several week not recommended.
