2 Images

### Overview

Quantity:	50 µg
Target:	VAPA
Binding Specificity:	AA 1-223
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Application:	Western Blotting (WB), Immunocytochemistry (ICC)

### Product Details

Immunogen:	Recombinant protein (aa 1-223) of human VAP-A.
Specificity:	Specific for VAP-A.
Purification:	Affinity purified with the immunogen. Rabbit serum albumin was added for stabilization.

### Target Details

Target:	VAPA
Alternative Name:	VAP-A ( <a href="#">VAPA Products</a> )
Background:	Synonyms: VAP-33

### Application Details

Application Notes:	WB: 1 : 1000 (AP staining)
--------------------	----------------------------

## Application Details

---

IP: not tested yet  
ICC: 1 : 500  
IHC: not tested yet

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

Reconstitution: For reconstitution add 50  $\mu$ L H<sub>2</sub>O to get a 1mg/ml solution of antibody in PBS. Then aliquot and store at -20 °C until use.

Buffer: PBS

Handling Advice: Affinity purified antibodies are less robust than antisera, since protease inhibitors are also removed during purification. Hence, storage at 4 °C for prolonged periods (i.e. several weeks), is not recommended.

Storage: -20 °C

Storage Comment: Unlabeled lyophilized antibodies are stable in this form without loss of quality at ambient temperatures for several weeks or even months. They can be stored at 4°C for several years. Lyophilized antibodies must not be stored in the freezer, they may be destroyed!
