[Go to Product page](#)

Overview

Quantity:	50 µg
Target:	ELK3
Binding Specificity:	AA 189-204
Reactivity:	Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Application:	Western Blotting (WB), Immunohistochemistry (IHC)

Product Details

Immunogen:	Synthetic peptide (aa 189-204 of rat NET precursor protein) coupled to key-hole limpet hemocyanin via an added C-terminal cysteine.
Specificity:	Specific for NET.
Purification:	Affinity purified with the immunogen. Rabbit serum albumin was added for stabilization.

Target Details

Target:	ELK3
Alternative Name:	NET (ELK3 Products)
Background:	Synonyms: SLC6A2

Application Details

Application Notes:	WB: 1 : 1000 IP: not tested yet ICC: not tested yet IHC: 1 : 200
Comment:	WB: This protein tends to aggregate after boiling, making it necessary to run SDS-PAGE with non-boiled samples.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Reconstitution:	For reconstitution add 50 µL H ₂ O to get a 1mg/ml solution of antibody in PBS. Then aliquot and store at -20 °C until use.
Buffer:	PBS
Handling Advice:	Affinity purified antibodies are less robust than antisera, since protease inhibitors are also removed during purification. Hence, storage at 4 °C for prolonged periods (i.e. several weeks), is not recommended.
Storage:	-20 °C
Storage Comment:	Unlabeled lyophilized antibodies are stable in this form without loss of quality at ambient temperatures for several weeks or even months. They can be stored at 4°C for several years. Lyophilized antibodies must not be stored in the freezer, they may be destroyed!
