## Overview

Quantity:	100 µg
Target:	RAB26
Reactivity:	Human, Rat, Mouse
Host:	Mouse
Clonality:	Monoclonal
Application:	Western Blotting (WB), Immunocytochemistry (ICC)

## Product Details

Immunogen:	Full length recombinant human Rab 26.
Clone:	163E12
Isotype:	IgG2a
Specificity:	Specific for Rab 26.
Purification:	purified IgG. Azide was added before lyophilization.

## Target Details

Target:	RAB26
Alternative Name:	Rab 26 ( <a href="#">RAB26 Products</a> )

## Application Details

Application Notes:	WB: 1 : 1000 (AP staining)
--------------------	----------------------------

## Application Details

---

IP: not tested yet  
ICC: 1 : 100  
IHC: not tested yet

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

Reconstitution: For reconstitution add 100 µL H<sub>2</sub>O to get a 1mg/ml solution of antibody in PBS. Then aliquot and store at -20 °C until use.

Buffer: PBS, 0.02% sodium azide

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Handling Advice: Do not store diluted antibody solutions unless you add detergent or carrier proteins such as goat serum, BSA or others. IgG sticks to glass and plastic. Any IgG solution below 0.1 mg/mL protein will quickly adsorb and denature and thus lose activity! Repetitive freeze-thawing of dilute purified IgG is almost certain to lead to substantial losses.

Storage: -20 °C

Storage Comment: Unlabeled antibodies are stable in this form without loss of quality at ambient temperatures for several weeks or even months. They can be stored at 4 °C for several years.
