Overview

Quantity:	100 µL
Target:	MARCKS
Reactivity:	Human, Rat, Cow, Pig
Host:	Rat
Clonality:	Polyclonal
Conjugate:	This MARCKS antibody is un-conjugated
Application:	Western Blotting (WB), Immunofluorescence (IF), Immunohistochemistry (IHC), Immunocytochemistry (ICC)

Product Details

Target Details

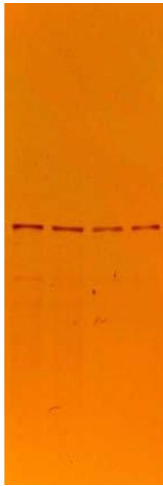

Target:	MARCKS
Alternative Name:	MARCKS ( <a href="#">MARCKS Products</a> )

Application Details

Restrictions:	For Research Use only
---------------	-----------------------

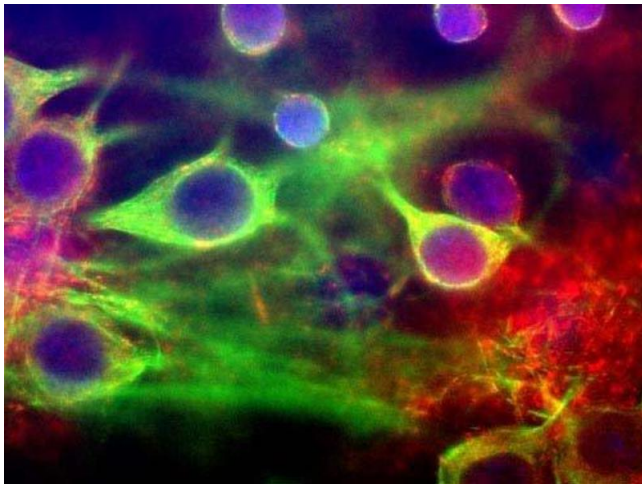

Handling

Format:	Liquid
---------	--------

### Western Blotting

**Image 1.** Western blot of whole rat cortex, cerebellum, brain stem and spinal cord homogenate stained with RPCA-MARCKS, at dilution of 1:10,000. A prominent band running with an apparent SDS-PAGE molecular weight of ~80 kDa corresponds to MARCKS.

### Immunofluorescence

**Image 2.** High Magnification view of mixed neuron/glia cultures stained with our MARCKS antibody (red) and CPCA-MAP2, antibody to MAP2 made in chicken. Blue is DNA stain. Note that the MARCKS antibody stains vesicular structures both in the glial cells and in the dendrites of the neurons, which are stained with the MAP2 antibody.
