| Comment:            | The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37&degC for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration  |

| Precaution of Use:  | WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled.<br>Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin or<br>eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a<br>physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilute<br>azide-containing compounds in running water before discarding to avoid accumulation of<br>potentially explosive deposits in lead or copper plumbing. |
