anti-CUBN antibody (AA 3511-3623)

Images

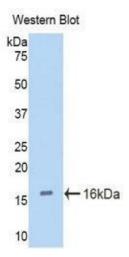

_							
0	V	е	r١	/1	е	V	1

Background:

Quantity:	100 μL
Target:	CUBN
Binding Specificity:	AA 3511-3623
Reactivity:	Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This CUBN antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunocytochemistry (ICC)
Product Details	
Immunogen:	CUBN (Cys3511-Ser3623)
Isotype:	IgG
Specificity:	The antibody is a rabbit polyclonal antibody raised against CUBN. It has been selected for its ability to recognize CUBN in immunohistochemical staining and western blotting.
Purification:	Antigen-specific affinity chromatography
Target Details	
Target:	CUBN
Alternative Name:	Cubilin (CUBN) (CUBN Products)

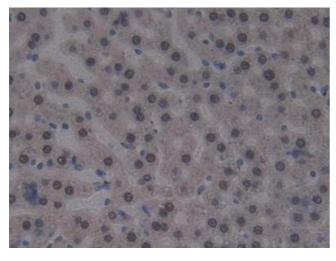

Alternative Names: IFCR, MGA1, gp280, Intrinsic Factor Cobalamin Receptor, 460 kDa receptor,

Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistoche paraffin section: 1:10-100 Enzyme-linked Immunosorbent Assay: 1:100-1:5000 O working dilutions must be determined by end user. Comment: The thermal stability is described by the loss rate. The loss rate was determined by thermal degradation test, that is, incubate the protein at 37°C for 48h, and no o degradation and precipitation were observed. The loss rate is less than 5% within the date under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested of Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, comphysician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions.				
Application Details Application Notes: - Western blotting: 1:50-400 Immunocytochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochemistry in formalin fixed cells:		Intestinal intrinsic factor receptor, Intrinsic factor-vitamin B12 receptor		
Application Notes: - Western blotting: 1:50-400 Immunocytochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochemistry in formalin fixed f	Pathways:	Metabolism of Steroid Hormones and Vitamin D, Lipid Metabolism		
Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistoci paraffin section: 1:10-100 Enzyme-linked Immunosorbent Assay: 1:100-1:5000 O working dilutions must be determined by end user. Comment: The thermal stability is described by the loss rate. The loss rate was determined by thermal degradation test, that is, incubate the protein at 37°C for 48h, and no o degradation and precipitation were observed. The loss rate is less than 5% within the date under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, cophysician immediately, Sodium azide yields toxic hydrazoic acid under acidic condiazide-containing compounds in running water before discarding to avoid accumula potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Application Details			
thermal degradation test, that is, incubate the protein at 378degC for 48h, and no o degradation and precipitation were observed. The loss rate is less than 5% within the date under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested of Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, cophysician immediately. Sodium azide yields toxic hydrazoic acid under acidic condication azide-containing compounds in running water before discarding to avoid accumulate potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Application Notes:	 Western blotting: 1:50-400 Immunocytochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochemistry in paraffin section: 1:10-100 Enzyme-linked Immunosorbent Assay: 1:100-1:5000 Optimal working dilutions must be determined by end user. 		
Format: Liquid Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested of Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, comphysician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditional azide-containing compounds in running water before discarding to avoid accumulate potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.		
Format: Liquid Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested of Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, comphysician immediately. Sodium azide yields toxic hydrazoic acid under acidic condinazide-containing compounds in running water before discarding to avoid accumulate potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Restrictions:	For Research Use only		
Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested of Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, comphysician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditional azide-containing compounds in running water before discarding to avoid accumulate potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Handling			
Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested of Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, comphysician immediately. Sodium azide yields toxic hydrazoic acid under acidic condinazide-containing compounds in running water before discarding to avoid accumulate potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Format:	Liquid		
Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested of Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, comphysician immediately. Sodium azide yields toxic hydrazoic acid under acidic condinazide-containing compounds in running water before discarding to avoid accumulate potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Concentration:	Lot specific		
Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested of Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, comphysician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditionazide-containing compounds in running water before discarding to avoid accumulate potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Buffer:	PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol.		
Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling eye contact occurs, wash with copious amounts of water. If ingested or inhaled, comphysician immediately. Sodium azide yields toxic hydrazoic acid under acidic condinazide-containing compounds in running water before discarding to avoid accumulate potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Preservative:	Sodium azide		
Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Precaution of Use:	WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin or eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilute azide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing.		
Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Handling Advice:	Avoid repeated freeze-thaw cycles.		
	Storage:	4 °C		
Expiry Date: 12 months	Storage Comment:	Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.		
	Expiry Date:	12 months
