$\bigcap \bigvee \triangle$	1 \/ 1	$\square \backslash \backslash \backslash \backslash$	۱

Quantity:	200 μL
Target:	TGFB1
Reactivity:	Pig
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This TGFB1 antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunoprecipitation (IP), Immunocytochemistry (ICC)

### **Product Details**

Purpose:	Monoclonal Antibody to Transforming Growth Factor Beta 1 (TGFb1)
Immunogen:	The antibody is a mouse monoclonal antibody raised against TGFb1.
Isotype:	IgG
Specificity:	The antibody is a mouse monoclonal antibody raised against TGFb1. It has been selected for its ability to recognize TGFb1 in immunohistochemical staining and western blotting.
Cross-Reactivity:	Human, Mouse, Rat
Purification:	Antigen-specific affinity chromatography followed by Protein A affinity chromatography
Target Details	
Target:	TGFB1

### **Target Details**

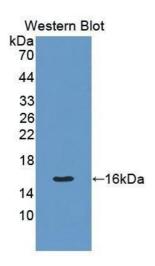

Alternative Name:	TGFb1 (TGFB1 Products)
Background:	TGF-B1, CED, DPD1, LAP, Camurati-Engelmann Disease, Latency-associated peptide
Pathways:	EGFR Signaling Pathway, Dopaminergic Neurogenesis, Cellular Response to Molecule of
	Bacterial Origin, Glycosaminoglycan Metabolic Process, Regulation of Leukocyte Mediated
	Immunity, Regulation of Muscle Cell Differentiation, Positive Regulation of Immune Effector
	Process, Cell-Cell Junction Organization, Production of Molecular Mediator of Immune
	Response, Ribonucleoside Biosynthetic Process, Skeletal Muscle Fiber Development,
	Regulation of Carbohydrate Metabolic Process, Protein targeting to Nucleus, Autophagy,
	Cancer Immune Checkpoints

Application Details	
Application Notes:	Western blotting: 0.2-2 μg/mL,1:500-5000 Immunohistochemistry: 5-20 μg/mL,1:50-200 Immunocytochemistry: 5-20 μg/mL,1:50-200 Optimal working dilutions must be determined by end user.
Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerate thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiratio date under appropriate storage condition.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 mg/mL
Buffer:	PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol.
Preservative:	Sodium azide
Precaution of Use:	WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled.  Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin or eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilute azide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing.
Handling Advice:	Avoid repeated freeze/thaw cycles

### Handling

Storage:	4 °C,-20 °C	
Storage Comment:	rage Comment: Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year w detectable loss of activity. Avoid repeated freeze-thaw cycles.	
Expiry Date:	12 months
