| Comment:            | The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37&degC for 48h, and no obvious   |  |
|                     | degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.  |  |
