anti-LOR antibody (AA 210-295)

Images

Overview

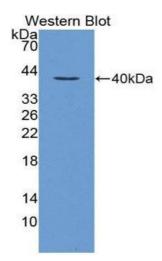

Quantity:	100 μL
Target:	LOR
Binding Specificity:	AA 210-295
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This LOR antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunoprecipitation (IP), Immunocytochemistry (ICC)

Product Details

1 Toddet Details	
Purpose:	Polyclonal Antibody to Loricrin (LOR)
Immunogen:	Recombinant Loricrin (LOR) corresdonding to N-terminal His Tag
Isotype:	IgG
Specificity:	The antibody is a rabbit polyclonal antibody raised against LOR. It has been selected for its ability to recognize LOR in immunohistochemical staining and western blotting.
Purification:	Antigen-specific affinity chromatography followed by Protein A affinity chromatography
Target Details	
Target:	LOR

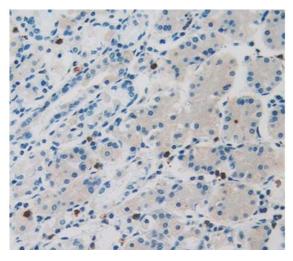

Target Details

20 µg/mL Optimal working dilutions must be determined by end user. Comment: The thermal stability is described by the loss rate. The loss rate was determined by accelera thermal degradation test, that is, incubate the protein at 37°C for 49h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expirat date under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: Lot specific Buffer: 0.01M PBS, pH 7.4, containing 0.05 % Proclin-300, 50 % glycerol. Preservative: ProClin Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin eye contact occurs, wash with copious amounts of water. If ingested or inhaled. Avoid contact with skin, eyes, or clothing wear eye or face protection when handling. If skin eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilu azide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C,-20 °C		
Application Details Application Notes: Western blotting: 0.5-2 µg/mL Immunohistochemistry: 5-20 µg/mL Immunocytochemistry: 5-	Alternative Name:	Loricrin (LOR Products)
Application Notes: Western blotting: 0.5-2 µg/mL Immunohistochemistry: 5-20 µg/mL Immunocytochemistry: 5-20 µg/mL Immunochemistry: 5-20 µg/mL Immunochemis	Target Type:	Chemical
20 µg/mL Optimal working dilutions must be determined by end user. Comment: The thermal stability is described by the loss rate. The loss rate was determined by accelerathermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expirated tate under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: Lot specific Buffer: 0.01M PBS, pH 7.4, containing 0.05 % Proclin-300, 50 % glycerol. Preservative: Proclin Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilt azide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C, 20 °C Storage Comment: Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year withou detectable loss of activity. Avoid repeated freeze-thaw cycles.	Application Details
