Comment:	The thermal stability is described by the loss rate of the target protein. The loss rate was
	determined by accelerated thermal degradation test, that is, incubate the protein at 37 °C for
	48h, and no obvious degradation and precipitation were observed. (Referring from China
	Biological Products Standard, which was calculated by the Arrhenius equation.) The loss of this
	protein is less than 5% within the expiration date under appropriate storage condition.
Restrictions:	For Research Use only
