Application Details

he thermal stability is described by the loss rate of the target protein. The loss rate was
etermined by accelerated thermal degradation test, that is, incubate the protein at 37 °C for
3h, and no obvious degradation and precipitation were observed. (Referring from China
ological Products Standard, which was calculated by the Arrhenius equation.) The loss of this
rotein is less than 5% within the expiration date under appropriate storage condition.
