| Comment: | The thermal stability is described by the loss rate of the target protein. The loss rate was |
|----------|---|
| | determined by accelerated thermal degradation test, that is, incubate the protein at 37 °C for |
| | 48h, and no obvious degradation and precipitation were observed. (Referring from China |
| | Biological Products Standard, which was calculated by the Arrhenius equation.) The loss of this |
| | protein is less than 5% within the expiration date under appropriate storage condition. |
