

Datasheet for ABIN1882411 **beta Amyloid ELISA Kit**

[Go to Product page](#)

Overview

Quantity: 1 kit

Target: beta Amyloid (Abeta)

Reactivity: Human

Application: ELISA

Product Details

Brand: SensoLyte®

Analytical Method: Quantitative

Detection Method: Colorimetric

Characteristics: This SensoLyte® high-sensitivity (2 pg/mL) beta-Amyloid (1-42) Quantitative ELISA Kit (Human) provides a convenient and quantitative assay for determining human beta-Amyloid (1-42) (Abeta42) amount in cell and tissue lysate as well as in body fluids. Compared to other anti-human Abeta42 ELISA kits on the market, it takes less time to run this assay. HRP conjugated detection antibody in this kit is added simultaneously with samples and standards during the assay. This eliminates extra incubation and washing steps and makes this kit one-step procedure for Abeta42 quantification.

Target Details

Target: beta Amyloid (Abeta)

Alternative Name: beta-Amyloid ([Abeta Products](#))

Pathways: [Inflammasome](#)

Application Details

Comment: ELISA Kit

Restrictions: For Research Use only

Handling

Storage: 4 °C

Storage Comment: Upon receipt, store all kit components at 2-8 °C for up to 6 months. Reconstituted Peptide Standard (Component B) must be stored at -80 °C in small aliquots

Expiry Date: 6 months
