## Overview

|                      |                                         |
|----------------------|-----------------------------------------|
| Quantity:            | 200 µL                                  |
| Target:              | GFER                                    |
| Binding Specificity: | AA 67-94                                |
| Reactivity:          | Human                                   |
| Host:                | Rabbit                                  |
| Clonality:           | Polyclonal                              |
| Conjugate:           | This GFER antibody is conjugated to APC |
| Application:         | Western Blotting (WB), ELISA            |

## Product Details

|               |                                                                                                                                                                 |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Isotype:      | IgG                                                                                                                                                             |
| Specificity:  | This GFER antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 67-94 amino acids from the Central region of human GFER. |
| Purification: | Affinity purified                                                                                                                                               |

## Target Details

|                                                                                         |                                        |
|-----------------------------------------------------------------------------------------|----------------------------------------|
| Target:                                                                                 | GFER                                   |
| Alternative Name:                                                                       | GFER ( <a href="#">GFER Products</a> ) |
| Background:                                                                             | Name/Gene ID: GFER                     |
| Synonyms: GFER, ERV1, HPO1, HPO2, HPO, HSS, Hepatopoietin, ALR, ERV1 homolog, Erv1-like |                                        |

## Target Details

growth factor, Hepatopoietin protein, HERV1

Gene ID: 2671

Pathways: [SARS-CoV-2 Protein Interactome](#)

## Application Details

Application Notes: Approved: ELISA, WB

Usage: The applications listed have been tested for the unconjugated form of this product.  
Other forms have not been tested.

Comment: Target Species of Antibody: Human

Restrictions: For Research Use only

## Handling

Format: Liquid

Concentration: Lot specific

Buffer: PBS, no preservatives added

Preservative: Without preservative

Handling Advice: Aliquot to avoid repeated freezing and thawing.

Storage: 4 °C, -20 °C

Storage Comment: Short term: store at 4°C. Long term: aliquot and store -20°C for up to 6 months. Avoid freeze-thaw cycles. Protect from light.

Expiry Date: 6 months
