**anti-DRAK2 antibody (AA 351-365)****2** Images[Go to Product page](#)

## Overview

|                      |                                      |
|----------------------|--------------------------------------|
| Quantity:            | 0.1 mg                               |
| Target:              | DRAK2 (STK17B)                       |
| Binding Specificity: | AA 351-365                           |
| Reactivity:          | Human                                |
| Host:                | Rabbit                               |
| Clonality:           | Polyclonal                           |
| Conjugate:           | This DRAK2 antibody is un-conjugated |
| Application:         | Western Blotting (WB)                |

## Product Details

|               |                     |
|---------------|---------------------|
| Purification: | Affinity - Purified |
|---------------|---------------------|

## Target Details

|                   |                                                    |
|-------------------|----------------------------------------------------|
| Target:           | DRAK2 (STK17B)                                     |
| Alternative Name: | STK17B / DRAK2 ( <a href="#">STK17B Products</a> ) |

## Application Details

|               |                       |
|---------------|-----------------------|
| Restrictions: | For Research Use only |
|---------------|-----------------------|

Immunocytochemistry

**Image 1.** Immunocytochemical staining of DRK2 in Jurkat cells with DRK2 antibody at 10µg/ml.

Western Blotting

**Image 2.** Western blot analysis of DRK2 in Jurkat (1,3) and Raji (2,4) cell lysate in the absence (1,2) or presence (3,4) of blocking peptide with DRK2 antibody at 1 g/ml. NOTE: The approx. 70kDa band observed is peptide-blockable and may represent DRK2 complexed with another protein. Positive control: Whole cell lysate from Jurkat or Raji cells.
