Datasheet for ABIN190788

**anti-SALL1 antibody (Internal Region)**

## Overview

Quantity:	100 µg
Target:	SALL1
Binding Specificity:	Internal Region
Reactivity:	Human, Mouse, Rat, Dog
Host:	Goat
Clonality:	Polyclonal
Conjugate:	This SALL1 antibody is un-conjugated
Application:	ELISA

## Product Details

Purpose:	SALL1
Immunogen:	Peptide with sequence C-QDSKDTPTSHVPS, from the internal region of the protein sequence according to NP_002959.2.
Sequence:	QDSKDTPTSH VPS
Isotype:	IgG
Predicted Reactivity:	Human, Mouse, Rat, Dog
Purification:	Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.
Grade:	Recent

## Target Details

Target:	SALL1
Alternative Name:	SALL1 ( <a href="#">SALL1 Products</a> )
Background:	SALL1, sal-like 1 (Drosophila) , HSAL1, TBS, ZNF794 , sal (Drosophila)-like 1, sal-like 1
Gene ID:	6299
NCBI Accession:	<a href="#">NP_002959</a>
Pathways:	<a href="#">Tube Formation</a>

## Application Details

Application Notes:	<p>DS WB Results: Preliminary experiments gave an approx 40 kDa band in Human Umbilical Cord, Ovary, Placenta and Testis lysates after 0.1 µg/mL antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 140 kDa according to NP_002959.2. The 40 kDa band was successfully blocked by incubation with the immunizing peptide. Have any further splice variants/modified forms been reported?</p> <p>Peptide ELISA: antibody detection limit dilution 1:1000.</p>
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Concentration:	0.5 mg/mL
Buffer:	Supplied at 0.5 mg/mL in Tris saline, 0.02 % sodium azide, pH 7.3 with 0.5 % bovine serum albumin.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Minimize freezing and thawing.
Storage:	-20 °C
Storage Comment:	Aliquot and store at -20°C, with minimal freeze/thawing. A working aliquot may be refrigerated at 4°C for a few weeks and still remain viable.
