## Overview

|                      |                                             |
|----------------------|---------------------------------------------|
| Quantity:            | 200 µL                                      |
| Target:              | MECOM                                       |
| Binding Specificity: | AA 81-109                                   |
| Reactivity:          | Human, Mouse                                |
| Host:                | Rabbit                                      |
| Clonality:           | Polyclonal                                  |
| Conjugate:           | This MECOM antibody is conjugated to Biotin |
| Application:         | Western Blotting (WB), ELISA                |

## Product Details

|               |                                                                                                                                                                  |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Isotype:      | IgG                                                                                                                                                              |
| Specificity:  | This MDS1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 81-109 amino acids from the Central region of human MDS1. |
| Purification: | Affinity purified                                                                                                                                                |

## Target Details

|                                                                                    |                                                 |
|------------------------------------------------------------------------------------|-------------------------------------------------|
| Target:                                                                            | MECOM                                           |
| Alternative Name:                                                                  | MECOM / EVI1 ( <a href="#">MECOM Products</a> ) |
| Background:                                                                        | Name/Gene ID: MECOM                             |
| Synonyms: MECOM, AML1-EVI-1, EVI-1, EVI1, MDS1, MDS1 and EVI1 complex locus, MDS1- |                                                 |

## Target Details

EVI1, Oncogene EVI1, AML1-EVI-1 fusion protein, Zinc finger protein Evi1, Myelodysplasia syndrome 1, PRDM3

Gene ID: 2122

## Application Details

Application Notes: Approved: ELISA, WB

Usage: The applications listed have been tested for the unconjugated form of this product.  
Other forms have not been tested.

Comment: Target Species of Antibody: Human

Restrictions: For Research Use only

## Handling

Format: Liquid

Concentration: Lot specific

Buffer: PBS, no preservatives added

Preservative: Without preservative

Handling Advice: Aliquot to avoid repeated freezing and thawing.

Storage: 4 °C, -20 °C

Storage Comment: Short term: store at 4°C. Long term: aliquot and store -20°C for up to 6 months. Avoid freeze-thaw cycles. Protect from light.

Expiry Date: 6 months
