Application Details

Plate: Pre-coated

Protocol: Adenylate Cyclase 6 (ADCY6) BioAssay-ELISA Kit (Human) is a Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Adenylate Cyclase 6 (ADCY6). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Adenylate Cyclase 6 (ADCY6). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Adenylate Cyclase 6 (ADCY6), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Adenylate Cyclase 6 (ADCY6) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
