Datasheet for ABIN2043127 **CCR1 ELISA Kit**

Overview

Quantity:	96 tests
Target:	CCR1
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.15-10 ng/mL
Minimum Detection Limit:	0.15 ng/mL
Application:	ELISA

Product Details

Brand:	BioAssay™
Detection Method:	Colorimetric
Sensitivity:	< 0.071 ng/mL

Target Details

Target:	CCR1
Alternative Name:	Chemokine C-C-Motif Receptor 1 (CCR1) (CCR1 Products)

Application Details

Plate:	Pre-coated
Protocol:	Chemokine C-C-Motif Receptor 1 (CCR1) BioAssay-ELISA Kit (Human) is a Sandwich enzyme

Application Details

immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Chemokine C-C-Motif Receptor 1 (CCR1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Chemokine C-C-Motif Receptor 1 (CCR1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Chemokine C-C-Motif Receptor 1 (CCR1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Chemokine C-C-Motif Receptor 1 (CCR1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C
