Datasheet for ABIN2043503 **FPR1 ELISA Kit**

Overview

Quantity:	96 tests
Target:	FPR1
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.15-10 ng/mL
Minimum Detection Limit:	0.15 ng/mL
Application:	ELISA

Product Details

Brand:	BioAssay™
Detection Method:	Colorimetric
Sensitivity:	< 0.062 ng/mL

Target Details

Target:	FPR1
Abstract:	FPR1 Products

Application Details

Plate:	Pre-coated
Protocol:	Formyl Peptide Receptor 1 (FPR1) BioAssay-ELISA Kit (Human) is a Sandwich enzyme

Application Details

immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Formyl Peptide Receptor 1 (FPR1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Formyl Peptide Receptor 1 (FPR1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Formyl Peptide Receptor 1 (FPR1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Formyl Peptide Receptor 1 (FPR1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

Restrictions: For Research Use only

Handling

Storage: $4\text{ }^{\circ}\text{C}/-20\text{ }^{\circ}\text{C}$
