

Datasheet for ABIN2127728  
**17-beta-Testosterone Protein**

[Go to Product page](#)

## Overview

|               |                            |
|---------------|----------------------------|
| Quantity:     | 500 µL                     |
| Target:       | 17-beta-Testosterone       |
| Origin:       | Hormone                    |
| Source:       | Escherichia coli (E. coli) |
| Protein Type: | Recombinant                |
| Application:  | Immunoassay (IA), ELISA    |

## Product Details

### Target Details

|                   |                      |
|-------------------|----------------------|
| Target:           | 17-beta-Testosterone |
| Alternative Name: | 17b Testosterone-HRP |
| Target Type:      | Hormone              |

### Application Details

|                    |                                                                                                |
|--------------------|------------------------------------------------------------------------------------------------|
| Application Notes: | Recommened Dilution Factor: 1/320 when used in a competitive immunoassay with antibody 20-1052 |
| Restrictions:      | For Research Use only                                                                          |

## Handling

|         |        |
|---------|--------|
| Format: | Liquid |
|---------|--------|

Handling

---

|          |                                                                                                             |
|----------|-------------------------------------------------------------------------------------------------------------|
| Buffer:  | Supplied as a concentrate. Dilute as required and use working strength conjugate immediately after dilution |
| Storage: | 4 °C/-20 °C/-80 °C                                                                                          |
