Target Details

Background: Synonyms: ZFP36L2, BRF2, Butyrate response factor 2, EGF response factor 2, ERF 2, ERF2, Protein TIS11D, RNF162C, zinc finger protein 36, C3H type like 2, BRF2_HUMAN.

Background: TIS11D is a member of the TIS11 family of early response genes. Family members are induced by various agonists such as the phorbol ester TPA and the polypeptide mitogen EGF. The encoded protein contains a distinguishing putative zinc finger domain with a repeating cys-his motif. This putative nuclear transcription factor most likely functions in regulating the response to growth factors.
