Target Details

Target:	Claudin 16 (CLDN16)
Alternative Name:	Claudin 16 (CLDN16 Products)
Background:	Synonyms: HOMG3, PCLN1, Claudin-16, Paracellin-1, PCLN-1, CLDN16

Target Details

Background: Plays a major role in tight junction-specific obliteration of the intercellular space, through calcium-independent cell-adhesion activity. Involved in paracellular magnesium reabsorption. Required for a selective paracellular conductance. May form, alone or in partnership with other constituents, an intercellular pore permitting paracellular passage of magnesium and calcium ions down their electrochemical gradients. Alternatively, it could be a sensor of magnesium concentration that could alter paracellular permeability mediated by other factors.
