| Abstract: | IgM Products |
| Target Type: | Antibody |
| Background: | Immunoglobulin IgM normally constitutes about 10 % of serum immunoglobulins. IgM antibody |
| | is prominent in early immune responses to most antigens and is largely confined to plasma due |
| | to it's large size. Monomeric IgM is expressed as a membrane bound antibody on the surface |
| | of B cells and as a pentamer when secreted by plasma cells. |
