Target Details

Background:	Synonyms: AI593503, 2010004A03Rik, Interleukin-34, IL-34, II34
	Background: Cytokine that promotes the proliferation, survival and differentiation of monocytes
	and macrophages. Promotes the release of proinflammatory chemokines, and thereby plays ar
	important role in innate immunity and in inflammatory processes. Plays an important role in the
	regulation of osteoclast proliferation and differentiation, and in the regulation of bone
	resorption. Signaling via CSF1R and its downstream effectors stimulates phosphorylation of
	MAPK1/ERK2 AND MAPK3/ERK1 (By similarity).
