## Overview

|              |                                                   |
|--------------|---------------------------------------------------|
| Quantity:    | 50 µg                                             |
| Target:      | ADAM15                                            |
| Reactivity:  | Human                                             |
| Host:        | Goat                                              |
| Clonality:   | Polyclonal                                        |
| Conjugate:   | This ADAM15 antibody is conjugated to Biotin      |
| Application: | Western Blotting (WB), Immunohistochemistry (IHC) |

## Product Details

|                             |                                                                                   |
|-----------------------------|-----------------------------------------------------------------------------------|
| Immunogen:                  | Sf 21-derived, recombinant human A Disintegrin and metalloprotease-like Domain15. |
| Isotype:                    | IgG                                                                               |
| Cross-Reactivity:           | Human                                                                             |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                                                   |
| Characteristics:            | ADAM 15 (a Disintegrin and Metalloprotease 15, Metargidin, MDC15) (Biotin)        |
| Purification:               | Purified by immunoaffinity chromatography.                                        |

## Target Details

|                   |                                             |
|-------------------|---------------------------------------------|
| Target:           | ADAM15                                      |
| Alternative Name: | ADAM 15 ( <a href="#">ADAM15 Products</a> ) |

Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

Handling

|                  |                                                                                      |
|------------------|--------------------------------------------------------------------------------------|
| Format:          | Lyophilized                                                                          |
| Reconstitution:  | Reconstitute with 40-50 % glycerol, PBS.                                             |
| Buffer:          | Supplied as a lyophilized powder in 0.2um sterile-filtered solution in PBS with BSA. |
| Storage:         | -20 °C                                                                               |
| Storage Comment: | -20°C                                                                                |
