

## Datasheet for ABIN2208208 **anti-BAFF antibody**

[Go to Product page](#)

### Overview

|              |                                     |
|--------------|-------------------------------------|
| Quantity:    | 100 µg                              |
| Target:      | BAFF (TNFSF13B)                     |
| Reactivity:  | Human                               |
| Host:        | Goat                                |
| Clonality:   | Polyclonal                          |
| Conjugate:   | This BAFF antibody is un-conjugated |
| Application: | Western Blotting (WB), ELISA        |

### Product Details

|                             |                                                                              |
|-----------------------------|------------------------------------------------------------------------------|
| Immunogen:                  | Recombinant corresponding to human BAFF, expressed in E. coli                |
| Isotype:                    | IgG                                                                          |
| Cross-Reactivity:           | Human                                                                        |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                                              |
| Characteristics:            | BAFF (B cell Activating Factor belonging to TNF Family, BLyS, TALL-1, THANK) |
| Purification:               | Purified by immunoaffinity chromatography.                                   |

### Target Details

|                   |                                            |
|-------------------|--------------------------------------------|
| Target:           | BAFF (TNFSF13B)                            |
| Alternative Name: | BAFF ( <a href="#">TNFSF13B Products</a> ) |
| NCBI Accession:   | <a href="#">NP_006564</a>                  |

### Target Details

|           |                                                                                          |
|-----------|------------------------------------------------------------------------------------------|
| UniProt:  | <a href="#">Q9Y275</a>                                                                   |
| Pathways: | <a href="#">NF-kappaB Signaling, Production of Molecular Mediator of Immune Response</a> |

### Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

### Handling

|                  |                                      |
|------------------|--------------------------------------|
| Format:          | Liquid                               |
| Buffer:          | Supplied as a liquid in PBS, pH 7.2. |
| Storage:         | -20 °C                               |
| Storage Comment: | -20°C                                |
