## Overview

|                      |                                                          |
|----------------------|----------------------------------------------------------|
| Quantity:            | 200 µL                                                   |
| Target:              | FAM213A                                                  |
| Binding Specificity: | AA 180-209, C-Term                                       |
| Reactivity:          | Human                                                    |
| Host:                | Rabbit                                                   |
| Clonality:           | Polyclonal                                               |
| Conjugate:           | This FAM213A antibody is un-conjugated                   |
| Application:         | Western Blotting (WB), ELISA, Immunohistochemistry (IHC) |

## Product Details

|                             |                                                                                                                                                                         |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen:                  | C10orf58 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 180-209 amino acids from the C-terminal region of human C10orf58. |
| Isotype:                    | IgG                                                                                                                                                                     |
| Cross-Reactivity:           | Human                                                                                                                                                                   |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                                                                                                                                         |
| Characteristics:            | C10orf58, CT (FAM213A, C10orf58, PAMM, Redox-regulatory protein FAM213A, Peroxiredoxin-like 2 activated in M-CSF stimulated monocytes)                                  |
| Purification:               | Purified by Protein A affinity chromatography.                                                                                                                          |

## Target Details

|                   |                                               |
|-------------------|-----------------------------------------------|
| Target:           | FAM213A                                       |
| Alternative Name: | C10orf58 ( <a href="#">FAM213A Products</a> ) |
| NCBI Accession:   | <a href="#">NP_115709</a>                     |
| UniProt:          | <a href="#">Q9BRX8</a>                        |

## Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

## Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Supplied as a liquid in PBS, pH 7.2, 0.09 % sodium azide.                                                              |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | -20°C                                                                                                                  |
