

## Datasheet for ABIN2218498 **anti-CARD8 antibody**

[Go to Product page](#)

### Overview

|              |                                                                                                                     |
|--------------|---------------------------------------------------------------------------------------------------------------------|
| Quantity:    | 50 µg                                                                                                               |
| Target:      | CARD8                                                                                                               |
| Reactivity:  | Human                                                                                                               |
| Host:        | Mouse                                                                                                               |
| Clonality:   | Monoclonal                                                                                                          |
| Conjugate:   | This CARD8 antibody is un-conjugated                                                                                |
| Application: | Western Blotting (WB), Immunoprecipitation (IP), Flow Cytometry (FACS), Dot Blot (DB),<br>Immunochromatography (IC) |

### Product Details

|                             |                                                    |
|-----------------------------|----------------------------------------------------|
| Immunogen:                  | Partial recombinant sequence from human CARD8      |
| Clone:                      | 8C55                                               |
| Isotype:                    | IgG1                                               |
| Cross-Reactivity:           | Human                                              |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                    |
| Characteristics:            | CARD8 (Caspase Recruitment Domain, Cardinal/TUCAN) |
| Purification:               | Purified by Protein G affinity chromatography.     |

### Target Details

|         |       |
|---------|-------|
| Target: | CARD8 |
|---------|-------|

## Target Details

|                   |                                                               |
|-------------------|---------------------------------------------------------------|
| Alternative Name: | CARD8 ( <a href="#">CARD8 Products</a> )                      |
| NCBI Accession:   | <a href="#">NM_014959</a>                                     |
| UniProt:          | <a href="#">Q9Y2G2</a>                                        |
| Pathways:         | <a href="#">Positive Regulation of Endopeptidase Activity</a> |

## Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

## Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Supplied as a liquid in PBS, pH 7.4, 1 % BSA, 0.05 % sodium azide.                                                     |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | -20°C                                                                                                                  |
