

## Datasheet for ABIN2233701 **anti-Chymotrypsin antibody**

[Go to Product page](#)

### Overview

|              |                                                                                     |
|--------------|-------------------------------------------------------------------------------------|
| Quantity:    | 200 µL                                                                              |
| Target:      | Chymotrypsin (CTRL)                                                                 |
| Reactivity:  | Cow                                                                                 |
| Host:        | Rabbit                                                                              |
| Clonality:   | Polyclonal                                                                          |
| Conjugate:   | This Chymotrypsin antibody is un-conjugated                                         |
| Application: | Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Immunochromatography (IC) |

### Product Details

|                             |                                                           |
|-----------------------------|-----------------------------------------------------------|
| Isotype:                    | IgG                                                       |
| Cross-Reactivity:           | Cow (Bovine)                                              |
| Cross-Reactivity (Details): | Calculated cross reactivity: Bo                           |
| Characteristics:            | Chymotrypsin (ACT, Chymotrypsin-C, Caldecrin, CLCR, CTRC) |
| Purification:               | Purified by immunoaffinity chromatography.                |

### Target Details

|                   |                                                |
|-------------------|------------------------------------------------|
| Target:           | Chymotrypsin (CTRL)                            |
| Alternative Name: | Chymotrypsin ( <a href="#">CTRL Products</a> ) |
| Target Type:      | Chemical                                       |

### Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

### Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Supplied as a liquid in PBS, pH 7.2, 0.05 % sodium azide, 50 % glycerol.                                               |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | -20°C                                                                                                                  |
