## Overview

|                      |                                                                                     |
|----------------------|-------------------------------------------------------------------------------------|
| Quantity:            | 200 µL                                                                              |
| Target:              | Fibulin 1 (FBLN1)                                                                   |
| Binding Specificity: | AA 36-144                                                                           |
| Reactivity:          | Mouse                                                                               |
| Host:                | Rabbit                                                                              |
| Clonality:           | Polyclonal                                                                          |
| Conjugate:           | This Fibulin 1 antibody is un-conjugated                                            |
| Application:         | Western Blotting (WB), Immunohistochemistry (IHC), ELISA, Immunochromatography (IC) |

## Product Details

|                             |                                                                                                                                                                          |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| Isotype:                    | IgG                                                                                                                                                                      |
| Cross-Reactivity:           | Mouse (Murine)                                                                                                                                                           |
| Cross-Reactivity (Details): | Calculated cross reactivity: Mo                                                                                                                                          |
| Characteristics:            | FBLN1 (Fibulin 1, FBLN, Fibulin-1, FIBL-1, PP213)                                                                                                                        |

## Product Details

---

Purification: Purified by immunoaffinity chromatography.

## Target Details

---

Target: Fibulin 1 (FBLN1)

Alternative Name: FBLN1 ([FBLN1 Products](#))

## Application Details

---

Application Notes: Optimal working conditions should be determined by the investigator.

Restrictions: For Research Use only

## Handling

---

Format: Liquid

Buffer: Supplied as a liquid in PBS, pH 7.2, 0.05 % sodium azide, 50 % glycerol.

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: -20 °C

Storage Comment: -20°C
