## Overview

|                      |                                    |
|----------------------|------------------------------------|
| Quantity:            | 200 µL                             |
| Target:              | FGG                                |
| Binding Specificity: | N-Term                             |
| Reactivity:          | Human                              |
| Host:                | Rabbit                             |
| Clonality:           | Polyclonal                         |
| Conjugate:           | This FGG antibody is un-conjugated |
| Application:         | Western Blotting (WB), ELISA       |

## Product Details

|                             |                                                                           |
|-----------------------------|---------------------------------------------------------------------------|
| Immunogen:                  | Synthetic peptide selected from the N-terminal region of human FGG (KLH). |
| Isotype:                    | IgG                                                                       |
| Cross-Reactivity:           | Human, Mouse (Murine)                                                     |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu Mo                                        |
| Characteristics:            | FGG, NT (Fibrinogen gamma chain, PRO2061, FGG)                            |
| Purification:               | Purified by ammonium sulfate precipitation.                               |

## Target Details

|                   |                                      |
|-------------------|--------------------------------------|
| Target:           | FGG                                  |
| Alternative Name: | FGG ( <a href="#">FGG Products</a> ) |

## Target Details

NCBI Accession: [NP\\_068656](#)

UniProt: [P02679](#)

## Application Details

Application Notes: Optimal working conditions should be determined by the investigator.

Restrictions: For Research Use only

## Handling

Format: Liquid

Buffer: Supplied as a liquid in PBS, 0.09 % sodium azide.

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: -20 °C

Storage Comment: -20°C
