## Overview

|                      |                                         |
|----------------------|-----------------------------------------|
| Quantity:            | 100 µg                                  |
| Target:              | Formin 2 (FMN2)                         |
| Binding Specificity: | AA 650-700                              |
| Reactivity:          | Human                                   |
| Host:                | Rabbit                                  |
| Clonality:           | Polyclonal                              |
| Conjugate:           | This Formin 2 antibody is un-conjugated |
| Application:         | Western Blotting (WB)                   |

## Product Details

|                             |                                                             |
|-----------------------------|-------------------------------------------------------------|
| Immunogen:                  | Synthetic peptide corresponding to aa650-700 of human FMN2. |
| Isotype:                    | IgG                                                         |
| Cross-Reactivity:           | Human                                                       |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                             |
| Characteristics:            | FMN2 (Formin-2)                                             |
| Purification:               | Purified by Protein A affinity chromatography.              |

## Target Details

|                   |                                        |
|-------------------|----------------------------------------|
| Target:           | Formin 2 (FMN2)                        |
| Alternative Name: | FMN2 ( <a href="#">FMN2 Products</a> ) |

## Target Details

|                 |                                                             |
|-----------------|-------------------------------------------------------------|
| NCBI Accession: | <a href="#">NP_064450</a>                                   |
| Pathways:       | <a href="#">Regulation of Actin Filament Polymerization</a> |

## Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

## Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Supplied as a liquid in PBS, 0.05 % BSA, 0.05 % sodium azide.                                                          |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | -20°C                                                                                                                  |
