## Overview

|                      |                                      |
|----------------------|--------------------------------------|
| Quantity:            | 100 µg                               |
| Target:              | IFI30                                |
| Binding Specificity: | AA 27-250                            |
| Reactivity:          | Human                                |
| Host:                | Sheep                                |
| Clonality:           | Polyclonal                           |
| Conjugate:           | This IFI30 antibody is un-conjugated |
| Application:         | Western Blotting (WB)                |

## Product Details

|                             |                                                                                                |
|-----------------------------|------------------------------------------------------------------------------------------------|
| Immunogen:                  | Recombinant corresponding to aa27-250 from human GILT/IFI30 expressed in HEK293 cell (P13284). |
| Isotype:                    | IgG                                                                                            |
| Cross-Reactivity:           | Human                                                                                          |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                                                                |
| Characteristics:            | GILT (Gamma-Interferon-inducible Lysosomal Thiol Reductase, IFI30, IP30, Legumaturain)         |
| Purification:               | Purified by immunoaffinity chromatography.                                                     |

## Target Details

|         |       |
|---------|-------|
| Target: | IFI30 |
|---------|-------|

Target Details

Alternative Name: GILT (IFI30 Products)

Application Details

Application Notes: Optimal working conditions should be determined by the investigator.

Restrictions: For Research Use only

Handling

Format: Lyophilized

Reconstitution: Reconstitute with sterile PBS to 0.2 mg/mL.

Buffer: Supplied as a lyophilized powder in PBS, trehalose.

Storage: -20 °C

Storage Comment: -20°C
