

Datasheet for ABIN2302032  
**anti-LDLR antibody (AA 29-205)**

[Go to Product page](#)

## Overview

|                      |                                     |
|----------------------|-------------------------------------|
| Quantity:            | 50 µg                               |
| Target:              | LDLR                                |
| Binding Specificity: | AA 29-205                           |
| Reactivity:          | Human                               |
| Host:                | Chicken                             |
| Clonality:           | Polyclonal                          |
| Conjugate:           | This LDLR antibody is un-conjugated |
| Application:         | Western Blotting (WB), ELISA        |

## Product Details

|                             |                                                                                                                           |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------|
| Immunogen:                  | Synthetic peptide corresponding to aa29-205 of human LDLR. Protein GI Number: 4504975.<br>Protein Accession #: NP_00518.1 |
| Isotype:                    | IgY                                                                                                                       |
| Cross-Reactivity:           | Human, Mouse (Murine), Rat (Rattus)                                                                                       |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu Mo Rt                                                                                     |
| Characteristics:            | Lipoprotein Receptor, Low Density (LDLR, LDL Receptor)                                                                    |
| Purification:               | Purified by immunoaffinity chromatography.                                                                                |

## Target Details

|         |      |
|---------|------|
| Target: | LDLR |
|---------|------|

Target Details

|                 |                                               |
|-----------------|-----------------------------------------------|
| Abstract:       | <a href="#">LDLR Products</a>                 |
| NCBI Accession: | <a href="#">NP_000518</a>                     |
| Pathways:       | <a href="#">Hepatitis C, Lipid Metabolism</a> |

Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Supplied as a liquid in PBS, pH 7.2, 0.02 % sodium azide.                                                              |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | -20°C                                                                                                                  |
