

Datasheet for ABIN2315306
anti-MIA antibody (Biotin)

[Go to Product page](#)

Overview

Quantity:	100 µL
Target:	MIA
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This MIA antibody is conjugated to Biotin
Application:	ELISA, Western Blotting (WB), Activity Assay (AcA)

Product Details

Immunogen:	Highly pure (> 98%) recombinant human Melanoma Inhibitory Activity Protein (MIA)
Isotype:	IgG
Cross-Reactivity:	Human
Cross-Reactivity (Details):	Calculated cross reactivity: Hu
Characteristics:	Melanoma Inhibitory Activity Protein (MIA) (Biotin)
Purification:	Purified by affinity chromatography.

Target Details

Target:	MIA
Alternative Name:	Melanoma Inhibitory Activity Protein (MIA Products)

Application Details

Application Notes:	Optimal working conditions should be determined by the investigator.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	Supplied as a liquid in PBS, pH 7.2.
Storage:	4 °C,-20 °C
Storage Comment:	4°C/-20°C
